

Only One

This world is full of people, I wonder how we stay alive.
The earth, I dream about it, a million diff'rent things to thrive.
I keep wondering where will my dreams lead me when they seem so far away.

Let me live in a world
That I don't have to save

I will fight on if I have to
Gonna be true,
Mother Nature's friend

Let me live in a world,
That I don't have to save

Let me live in a world
That I don't have to save

I must fight on, I will be strong
Precious planet,
Only one we've got

Let me live in a world,
That I don't have to save

If we stop and think about it, and take too long, the earth is gone.
Don't make her wait, reuse things, recycle all until it's done.
I keep wondering where will my dreams lead me when the world is going to waste.

Let me live in a world
That I don't have to save

I will fight on if I have to
Gonna be true,
Mother Nature's friend

Let me live in a world,
That I don't have to save

Let me live in a world
That I don't have to save

I must fight on, I will be strong
Precious planet,
Only one we've got

Let me live in a world,
That I don't have to save

So I'm switching off the lights,
Drinking from the tap,
Mending all I can.

Recycle, reduce, reuse.
Recycle, reduce, reuse,

Let me live in a world
That I don't have to save

I will fight on if I have to
Gonna be true,
Mother Nature's friend

Let me live in a world,
That I don't have to save

Let me live in a world
That I don't have to save

I must fight on, I will be strong
Precious planet,
Only one we've got
It's our only planet, precious planet
Only one we've got

Let me live in a world,
That I don't have to save
